Install Mambo

pre-installation check

license

step 1

step 2

step 3

step 4

step 1

MySQL database configuration:

Setting up Mambo to run on your server involves 4 simple steps...

Please enter the hostname of the server Mambo is to be installed on.

Enter the MySQL username, password and database name you wish to use with Mambo.

Enter the table name prefix to be used by this Mambo instance and select how to do with in case existing tables from former installations.

Install the samples unless you are experienced Mamber wanting to start with a completely empty site.

Host Name: 10.252.2.220 (This is usually 'localhost')

MySQL User Name: udinharun (Either something as 'root' or a username given by the hoster)

MySQL Password: udinharun (For site security using a password for the mysql account is mandatory)

MySQL Database Name: mambo (Some hosts allow only a certain DB name per site. Use table prefix in this case for distinct mambo sites.)

MySQL Table Prefix: mos_ (Dont use 'old_' since this is used for backup tables)

Drop Existing Tables

Backup Old Tables (Any existing backup tables from former mambo installations will be replaced)

Install Sample Data (Dont uncheck this unless you are experienced with mambo!)

The screenshot shows a Mambo website using the 'SolarFlare II' template. The header features a large orange and yellow background image of a solar flare. The main menu on the left includes links for Home, Mambo License, News, Blog, Links, Contact Us, Search, News Feeds, FAQ's, Wrapper, MamboServer, and MamboForge. The main content area has a large 'oi!' graphic and text about email newsletters. Below this are sections for Latest News (with items like 'Newsflash 1' through 'Newsflash 5') and Popular items (with items like 'Example FAO Item 1' through 'Example News Item 5'). A sidebar on the right contains a 'NEWSFLASH' section with text about Mambo 4.5, a 'powered by mambo' logo, and a 'version 4.5.2' link. At the bottom is a 'POLL'S' section with a question 'This Mambo installation was ...' and several radio button options, with 'Vote' and 'Results' buttons at the bottom right.

Modul Manager

The image shows a screenshot of a web-based 'Module Manager' application. The title bar reads 'Module Manager [Site]'. The main content area is a table with the following columns: #, Module Name, Published, Reorder, Order, and Access. The table lists 10 modules, each with a checkbox in the first column and a yellow star icon in the second. The 'Published' column contains icons: a red 'X' for rows 1, 3, 7, and 10; a green checkmark for rows 2, 4, 5, 6, 8, and 9. The 'Reorder' column contains blue up and down arrow icons. The 'Order' column shows numerical values: 1, 1, 1, 2, 3, 4, 5, 6, 7, and 8. The 'Access' column is labeled 'Public' for all rows. At the bottom of the table, there is a blue footer bar with navigation links: '<< Start < Previous 1 2 3 4 Next > End >>'. Below the table, a status bar displays 'Display # 10' and 'Results 1 - 10 of 33'.

6 </head>
7
8 <body>
9
10 </body>
11 </html>
12
```

Delete Head Code in Dreamweaver

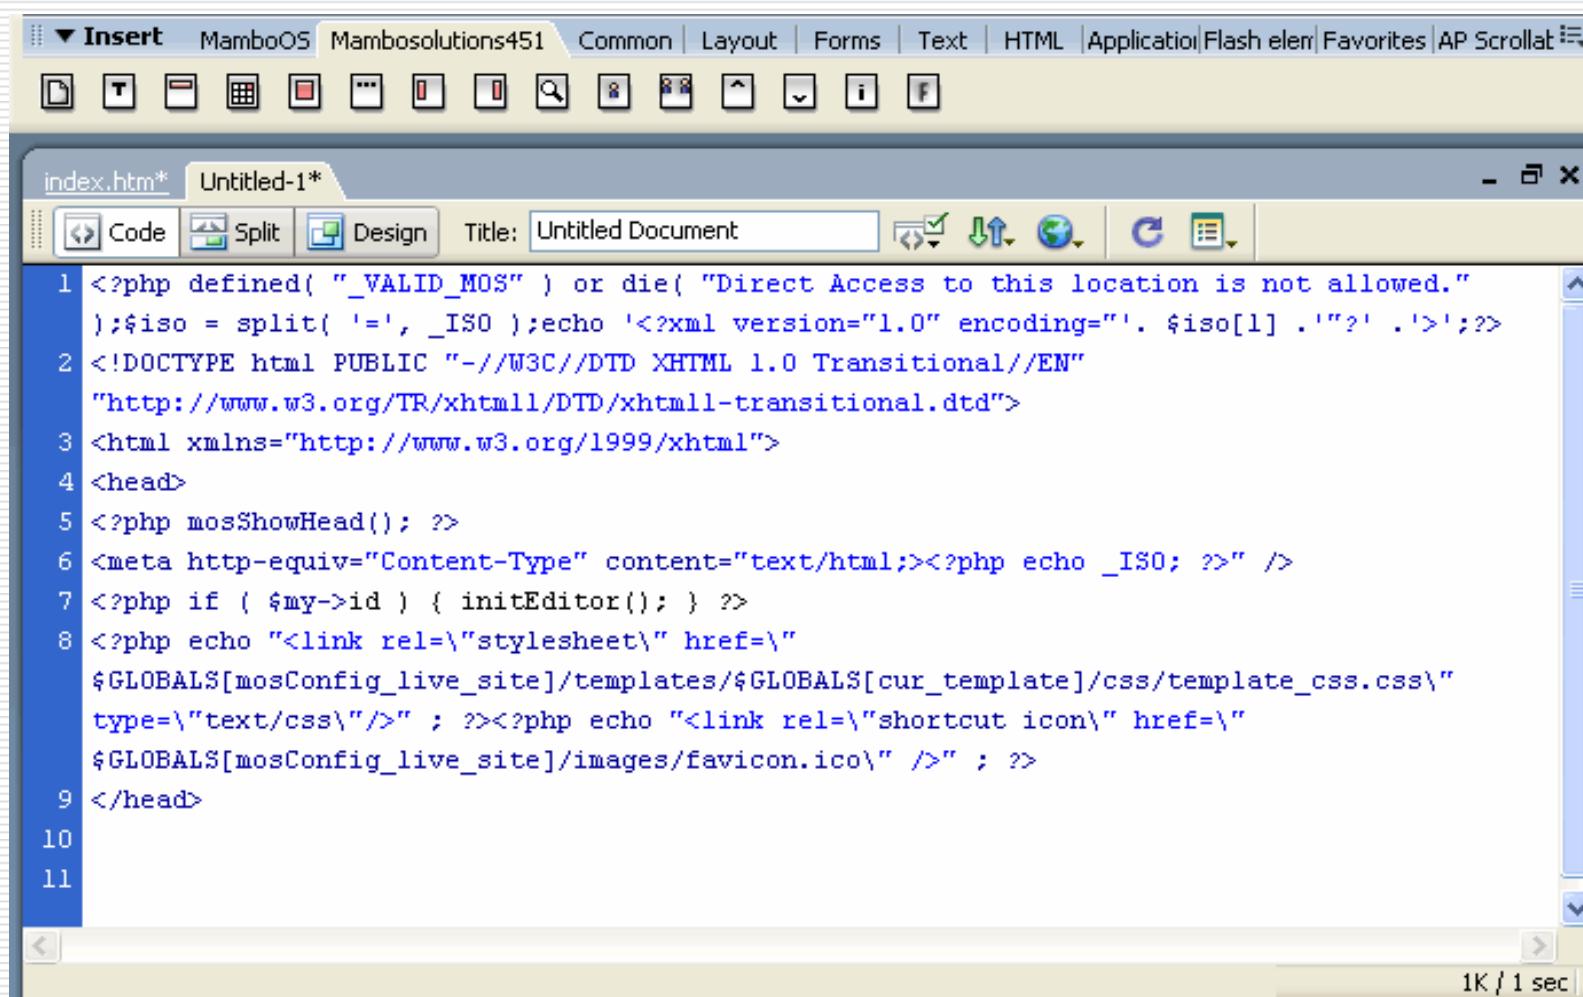

The image shows a screenshot of the Dreamweaver interface. The top menu bar is visible with 'Insert' selected. Below the menu is a toolbar with various icons. The main window shows an open file 'msasnews.htm*' and a new file 'Untitled-1*'. The 'Code' tab is selected in the top bar. The title bar says 'Title: Untitled Document'. The code editor displays the following HTML code:

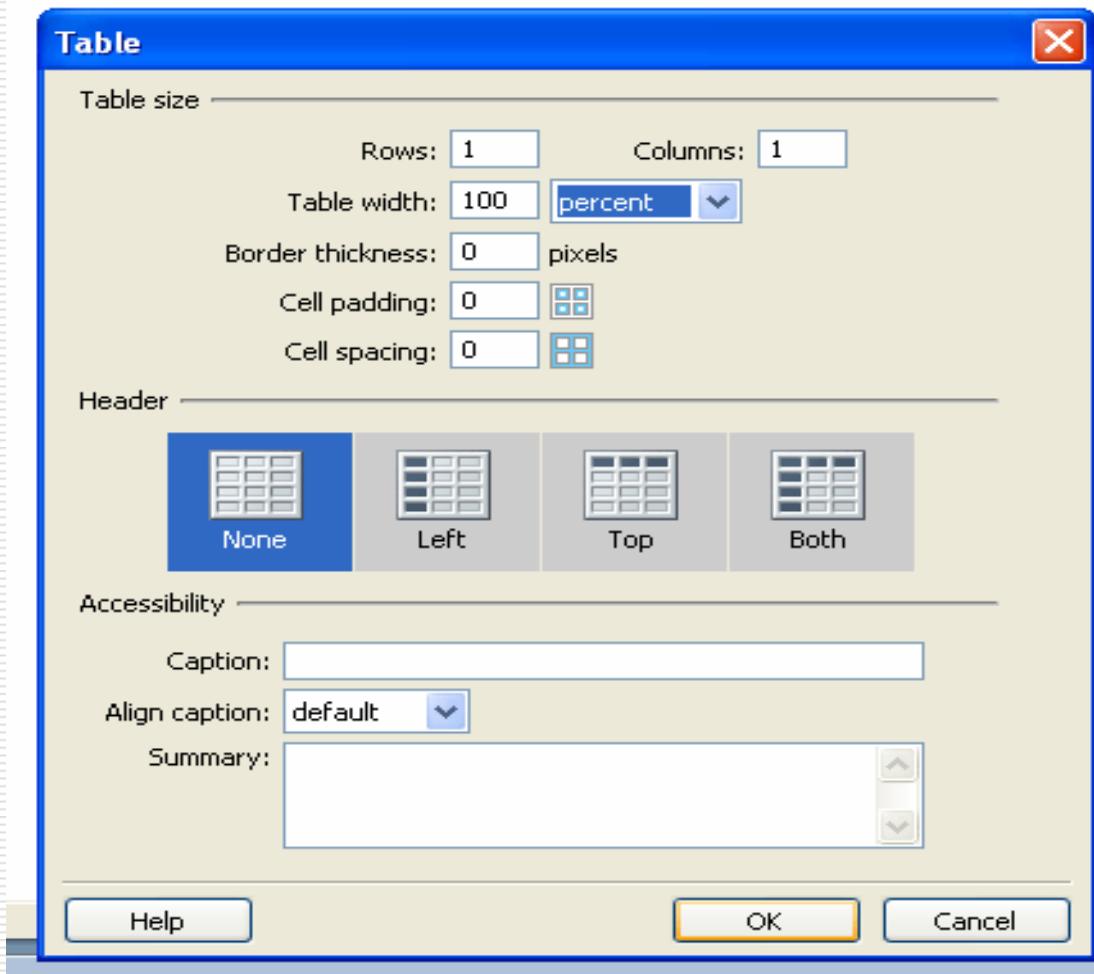

```
1 <!DOCTYPE HTML PUBLIC "-//W3C//DTD HTML 4.01 Transitional//EN" "http://www.w3.org/TR/html4/loose.dtd">
2 <html>
3 <head>
4 <title>Untitled Document</title>
5 <meta http-equiv="Content-Type" content="text/html; charset=iso-8859-1">
6 </head>
7
8 <body>
9
10 </body>
11 </html>
12
```

The line '5 <meta http-equiv="Content-Type" content="text/html; charset=iso-8859-1">' is highlighted with a black selection bar. The rest of the code is in white text on a black background.

Welcome to Mambo
Written by Web Master
Saturday, 12 June 2004

If you've read anything at all about Content Management Systems (CMS), you'll probably know at least three things: CMS are the most exciting way to do business, CMS can be really, I mean *really*, complicated and lastly Portals are absolutely, outrageously, often *unaffordably* expensive.

 Mambo is set to change all that ... Mambo is different from the normal models for portal software. For a start, it's not complicated. Mambo has been developed for the masses. It's licensed under the GNU/GPL license, easy to install and administer and reliable. Mambo doesn't even require the user or administrator of the system to know HTML to operate it once it's up and running.

[**The 7th Industrial Electronic Seminar \(IES \) 2005**](#)

Contributed by EEPIS News Team
Thursday, 24 November 2005

Industrial Electronic Seminar (IES) merupakan kegiatan utama tahunan dalam bentuk seminar yang bertujuan untuk mendorong penelitian, pengembangan, dan aplikasi elektronika dan teknologi informasi, dan juga untuk memajukan kerjasama secara luas dalam riset yang dilakukan. Pada IES ke-7 kali ini yang diadakan kamis, 24 November 2005 bertempat di kampus PENS-ITS, acara dibuka secara resmi oleh Direktur PENS, Dr. Titon Dutono dan dilanjutkan seminar utama dengan keynote spekaer oleh Dr. Trio Adiono, seorang staf pengajar elektronika ITB.
